

3-DAY FREE TRIAL · JUST AN EMAIL

ABAP Studio

An AI coding agent for SAP ABAP, built into a lightweight desktop app. Create, edit, and check ABAP objects, scaffold Fiori/UI5 apps, and create and release transport requests — all against your own SAP system.

abap-studio.github.io/abap-studio-site

Requirements

OPERATING SYSTEM

Windows 10 or 11

SAP

A valid account with ADT access

AI ACCESS

Claude Code subscription or AWS Bedrock

INSTALL

One portable .exe — nothing to install

How to install

1 Install Node.js

Get 20.12 or later from nodejs.org.

2 Download sap-mcp

github.com/abap-studio/sap-mcp — extract to %USERPROFILE%\sap-mcp.

3 Install dependencies

Run `npm install` in that folder. Once only.

4 Add SAP credentials

Copy `.env.example` to `.env` and fill in host, client, user, password.

5 Run ABAP Studio

Double-click the `.exe`. Enter a key, or click "Start a free trial" to get one instantly.

Trial vs. License

	Free Trial	License
Price	\$0	\$15 / month
Duration	3 days	Ongoing, while subscribed
Sessions	Up to 3 at a time	Unlimited
Devices	1	Up to 2
Features	Everything	Everything
Sign-up	Email only, no card	Monthly subscription

Both tiers include the full feature set — the trial is limited by time and session count, not by what it can do. A license key can be active on up to 2 devices at once.
